Dallas, TX | 914-623-3518 | shabaneh.ahmad@gmail.com | www.ahmadshabaneh.com

SKILLS

- ✓ **Frontend:** React, Next.js, TypeScript, Tailwind CSS, GraphQL, REST APIs, Responsive Design, Accessibility (a11y)
- ✓ **Backend:** Node.js, Django, Prisma, SQL/PostgreSQL
- ✓ **Cloud & DevOps:** AWS, Vercel, DigitalOcean, Jenkins, CI/CD pipelines, Docker
- ✓ **Testing & Tooling:** Jest, React Testing Library, Cypress, Git, Storybook

WORK EXPERIENCE

RemedyMeds

Software Engineer (Contract) | May 2025 - Present

- Implemented a PostHog feature flag with backend integration for subscription retention, surfacing targeted incentives that saved 500+ customer cancellations per month and triggering automated Slack workflows for account adjustments
- Integrated a full "Refer a Friend" system, including frontend referral flows, backend tracking, and discount application logic, driving 300+ new referral users in the first month and increasing customer engagement
- Created a Storybook component library, improving UI consistency and accelerating feature development

Great Lakes Reality Labs

Lead Frontend Engineer (Founding Team Member) | November 2021 - July 2024

- Rebuilt a monolithic Angular template into a modular React architecture, reducing technical debt and improving app scalability and performance by 20%, enabling faster feature delivery and smoother UX
- Engineered a role-based access control system that cut manual oversight by 30% and strengthened security across sensitive user workflows
- Integrated Stripe to support multi-tier subscription models, increasing conversions by 25% and monthly recurring revenue by 15% through custom plan flows

Apple (via Advantis Global)

Software Engineer (Contract) | July 2022 - January 2023

- Upgraded core components of Apple's enterprise ad platform to Angular v11, improving UX responsiveness and boosting business user engagement
- Rebuilt the analytics module end-to-end, enhancing data accuracy and surfacing actionable insights that enabled better campaign decision-making

Capital One (via Cognizant)

Software Engineer (Contract) | January 2020 - Nov 2020

- Developed and deployed Spring Boot microservices and Angular micro-frontends to bypass Salesforce file size constraints, ensuring seamless access for thousands of users
- Optimized Jenkins artifact pipeline, reducing CI/CD build times by 75% and accelerating deployments

American Systems

Software Engineer (Cybersecurity, DoD Contract) | August 2016 - May 2019

- Contracted with the DoD (Secret Clearance) to identify and mitigate vulnerabilities in defense systems (e.g., radar, tanks), reducing security incidents by 20%
- Developed a Python/Django GUI that automated vulnerability data pipelines, improving assessment efficiency by 35% and accelerating reporting

EDUCATION

MS, Computer Science | May 2019

BS, Computer Science | May 2017
